

Sub  
B<sub>1</sub>

1. (Amended) A gas storage and production system, comprising:  
a gas storage formation, wherein gas is stored within pores of  
formation rock;  
a production wellbore extending into the formation and  
withdrawing gas from the formation;  
a storage wellbore extending into the formation and injecting gas  
into the formation; and  
the production and storage wellbores intersecting at a wellbore  
junction.
